Omadbek Xusanboyev

Front End Developer

I am a **front-end developer** starting my career, with a strong focus on learning new technologies. I have successfully completed a **front-end course** and am eager to apply the skills I've learned in real-world projects. I have been working on various small projects, gaining experience in building web applications using **HTML, CSS, JavaScript**, and **React**. In addition to front-end development, I am passionate about **cybersecurity** and **creating Telegram bots**. I am continuously expanding my knowledge in these areas, aiming to develop deeper expertise in both.
